

Products

Curas is always sharing with our partners and customers our direction. The following input will be a clear guide to how Curas is developing the product range i.e. this section includes several products and product lines which are currently undergoing preparation for market launch.

In Curas you will soon find out that we do business with products we know a lot about. You will also see that we explore & learn more about products where we yet have much to realize. This – combined effort - represent today as well as tomorrow’s Curas.

Our heritage makes us focus on product lines that are associated with:

- Product Marketing
- Hygiene Pulp
- Hand Hygiene
- Intensive Care
- Operating Room
- Wound Care
- Medical Electronics
- Public Defib
- Examination Gloves
- Paper
- Waste Management
- Disposable Instruments

But we see no limits to our brand’s strength and cover, as long as we can add value to the situation of the partners, Curas will take up the challenge and master new product areas in the future.

Please contact Curas for further details on our products and services as well as information about our national distribution partners, who are ready to serve you in your place and time.
